Wednesday, November 10 • 1:30-3:30 pm
with Paranet Member Mark Alan from Inpro
In-Person at The Paranet Group Headquarters!

According to the United States Environmental Protection Agency, **sustainable manufacturing** is: *“The creation of manufactured products through economically-sound processes that minimize negative environmental impacts while conserving energy and natural resources.”*

Join us on November 10 to learn about the economic and environmental benefits of sustainable businesses practices from Paranet Member Mark Alan.

Sustainable Manufacturing Discussion Points:

- Challenging the 3-legged stool—the evolution of sustainability
- Cutting through complexity—what makes sense
- Continuous improvement is the driving force
- Employee engagement makes a difference

Who Should Attend This Event:

Plant Managers, Product Managers, Procurement, Operations Managers and Staff

Mark Alan is Senior Vice President Product Management and Development at Inpro Corporation and is a Certified LEED Green Associate. Headquartered in Wisconsin, InPro Corporation is the nation's premier manufacturer of building products, offering the most choices and best service in door and wall protection, solid surface, cubicle track & privacy curtains, expansion joint systems and signage & wayfinding. InPro products are used in the hospital/healthcare, senior living, education, government, hospitality and commercial sectors.
